

Invitation for Applications

Country	Somaliland
Project Holder	Ministry of Agriculture Development (MoAD)
Project	Sustainable Land Management Project
Fund	Somaliland Development Fund Phase 2
IFA Title	Resident Engineer – Soil and Water Conservation
Location	Borama – with travel to Hargeisa for Project Meetings
Period	18 months with renewal possibility
IFA No.	P101-092

The Somaliland Development Fund – Phase 2 (SDF2) covers the period 2018-2024. SDF2 is conceived as an inclusive economic development programme. It supports the GoSL in delivering infrastructure that is relevant for inclusive economic development. It focuses on sustainable investments that spur job creation and fast growth, while at the same time laying the foundation for long-term resilience and development, leading to a more stable and peaceful Somaliland. SDF2's support is fully aligned with government priorities as defined in the National Development Plan 2 (NDP2) 2017-2021 and reflect the priorities set out in Somaliland Vision 2030.

The SDF has allocated funds to the Ministry of Agriculture Development (MoAD) for the implementation of the Sustainable Land Management Project. Under the project, some of the funds will be used for Soil and Water Conservation activities in Durdur Ad catchment in Awdal region. This activity will require a qualified **Resident Engineer – Soil and Water Conservation**. Applications are therefore invited from qualified candidates.

Required qualifications, skills, and experience

Qualifications and skills

- Minimum of a Bachelor's Degree in Soil and Water Engineering or Civil Engineering.
- Proficiency in use of basic computer software such as MS Access, MS project Excel, Word, PowerPoint, AutoCAD.
- Demonstrated excellent command of spoken and written English and Somali.

General professional experience

- Minimum of 5 years' experience in construction management/supervision of civil works.
- Minimum of 3 years' experience of contract administration related to civil works.

Specific professional experience

- Minimum of 3 years as a Resident or Site Engineer in a project involving construction of medium to large earth works.
- Minimum of 3 years demonstrated ability to interpret technical specifications, drawings, bills of quantities, and setting out the Soil and Water Conservation interventions as per drawings.
